Wording of the question

10/2011	Variable description
<p>In June 2011, the Internet Corporation for Assigned Names and Numbers (ICANN) approved a programme to allow companies, organizations and communities to apply to operate an Internet domain name ending that corresponds to words or phrases, including an organization's name or brand. This means that companies, instead of having their brand or name before the ".com", could apply for a domain name extension that ends with their own brand name - effectively staking out their own piece of the Internet and allowing for a greater choice of possible domain names.</p> <p>a)Were you previously aware that ICANN had approved this programme for new domain name extensions?</p> <p>yes [1] <input type="checkbox"/> no [2] <input type="checkbox"/></p>
